

Neighborhood Wireless Survey

Community Wireless Internet Opportunity

The purpose of this survey is to gauge how your households would benefit from easily accessible wireless internet access.

This access will allow people of all ages to connect to school resources and career opportunities. With the Community Wireless Internet Project, this will allow you to connect your home security and healthcare devices, as well as basic entertainment streams for music and movies.

By investing your time in this survey, you will allow the Community Wireless Internet Project to bring wireless to your area.

Please fill out by <blank> to help us find interested communities. The top <blank> communities will be selected for our pilot program.
